

Unified Action

The Marine Corps will continue to train and experiment with the other Services, nations, governmental agencies, and non-governmental organizations to develop and sustain Combined/Joint capabilities. We will focus on command information, intelligence, reconnaissance, and networked information architectures to achieve a more unified approach for operations. We will align our efforts with the Joint Information Environment concept as well as the Mission Partner Environment¹ framework for sharing information between U.S., non-U.S., military, government and non-government organizations responding to missions across the ROMO. Expanding on recent experience, we must:

- Examine the combat-multiplier effect of integrating more Marines into key nodes of the Joint force and global SOF enterprise.
- Ensure all MAGTF operations have information warfare capabilities.
- Provide MEUs and Special Purpose MAGTFs (SPMAGTFs) secure networks capable of extending to/integrating with the Joint, Inter-agency, Intergovernmental, and Multinational (JIIM) force.
- Continue to emphasize task-organized, general-purpose forces for security cooperation activities to facilitate access, gain and maintain regional understanding, maintain liaison with the regional MARFORs, and achieve greater integration with theater special operations commands (TSOCs).
- Pursue wargaming and experimentation at the Service, MARFOR, and MAGTF levels, to help develop common processes essential to effective Combined/Joint operations.
- Determine the requirement for standing Liaison Officers at key agencies and organizations in the JIIM force that would produce a significant impact on MAGTF operations globally.
- Effectively employ the Joint Logistics Enterprise (JLEnt) to expand on capabilities already enhanced with Naval Logistics Integration.
